- Digital FM radio
- Premium sound box: Integrated sound box
- Sound off function: Option to mute sound immediately

Display
- Display brightness control: 4 settings, increases to max during 30 min wake-up
- Hidden LED display: Invisible display projected onto the product

Product highlights

Light wakes you naturally
Light gradually increases over 30 minutes before your set wake up time. Light falls on your eyes and positively affects your energy hormones, preparing your body to wake up. This makes waking up a more pleasant feeling.

300 Lux light intensity
The sensitivity to light differs a lot per person. In general, when using a higher light intensity a person needs less time to become fully awake. The light intensity of the Wake-up Light can be set up to 300 Lux. This makes sure you can wake up to the light intensity that suits your personal preference best.

4 natural and pleasant wake-up sounds
At your set wake-up time, you will start hearing a natural sound. It starts out quietly and takes a minute and a half to reach the volume level you selected. There are four sounds you can choose from: morning birds in the forest, a relaxing beep, the sounds of the African jungle or soft chimes in the wind. The gradually increasing sound will make the waking up process even more pleasant, ensuring you're never rudely awakened.

Digital FM radio
The built-in digital FM radio lets you wake up to your favourite songs or news station every day. Just select your favourite radio station and at your set wake-up time it will start to play, at first gently, gradually increasing over ninety seconds to the volume level you selected.

Great sound quality
The speaker in this Wake-up Light is backed up by an integrated sound box, assuring great sound quality when listing to the FM radio or when waking up with the natural wake-up sounds.

Sleep timer
The sleep timer lets you decide how long you want to leave the light on for reading or to listen to the radio before you fall asleep.

Energy-saving lamp
This Wake-up Light is the only dawn simulator that makes use of an environmentally-friendly energy-saving lamp. It consumes up to 56% less energy compared to a Wake-up Light with a normal light bulb. The expected lifetime of the lamp is up to 7 years with daily use of the wake-up function and 2 hours' use as bedside lamp. The lamp is integrated in the dimming system.
